WHY CHOOSE A CANOPY AWNING?

NVLODGE Canopy Awnings are like nothing else in the North American market. Contemporary European design and style that delivers premium performance in the harshest Canadian environments. Suitable for both domestic and commercial applications, from single door or window installations to complete building protection.

 **WEATHER RESISTANT**
Canada is prone to extreme changes in outdoor weather, from high wind speeds to rain and snow. To ensure your home is protected, our Canopy Awnings are thoroughly tested and assured to last whatever the weather.

 **UV RESISTANT**
Everyone knows what damage can be caused by prolonged exposure to the sun. NVLODGE Canopy Awnings block 99% of the sun's harmful UV rays, protecting your home and family.

 **CHEMICAL AND FIRE RESISTANT**
NVLODGE Canopy Awnings are specially coated with a unique formula to protect them from abrasive cleaning chemicals and to be resistant to fire.

 **IMPACT RESISTANT**
Life is unpredictable - with NVLODGE Canopy Awnings you're covered. Tested in various situations, our polycarbonate material is 15-20 times stronger than acrylic.

 **DOUBLE LAYER COMPOSITE CONSTRUCTION**
Canopy Awnings are the first in the world to use composite construction techniques to achieve the highest quality. Aluminium Canopy Awnings are double aluminium coated with a plastic core, allowing for strength, durability and versatility. Combined with layers of protective outdoor colour coating Canopy Awnings are designed to look good all year round.

 **SAVE ENERGY AND MONEY**
Our canopy awnings are designed to save you money! They reduce your winter heating and summer cooling costs and are the most cost effective awnings in the marketplace today!

 **EASY Do-It-Yourself SYSTEMS**
NVLODGE Canopy Awning DIY kits are easy to assemble and can be installed onto wood, brick or concrete.
